The influence of high positive end-expiratory pressure ventilation combined with low tidal volume on prognosis of patients with acute lung injury/acute respiratory distress syndrome: a meta-analysis

Yang J, Liu F, Zhu X

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
21251358

DOI
10.3760/cma.j.issn.1003-0603.2011.01.003

Indexing Status
Subject indexing assigned by NLM

MeSH
Acute Lung Injury /therapy; Humans; Positive-Pressure Respiration; Prognosis; Randomized Controlled Trials as Topic; Respiratory Distress Syndrome, Adult /therapy; Tidal Volume; Treatment Outcome

AccessionNumber
12011001997

Date bibliographic record published
20/07/2011
