When conventional heart failure therapy is not enough: angiotensin receptor blocker, direct renin inhibitor, or aldosterone antagonist?

Bangalore S, Kumar S, Messerli FH

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details
Bangalore S, Kumar S, Messerli FH. When conventional heart failure therapy is not enough: angiotensin receptor blocker, direct renin inhibitor, or aldosterone antagonist? Congestive Heart Failure 2013; 19(3): 107-115

PubMedID
23241032

DOI
10.1111/chf.12011

Indexing Status
Subject indexing assigned by NLM

MeSH
Angiotensin Receptor Antagonists /therapeutic use; Angiotensin-Converting Enzyme Inhibitors /therapeutic use; Heart Failure /drug therapy /physiopathology; Humans; Mineralocorticoid Receptor Antagonists /therapeutic use; Stroke Volume /drug effects; Ventricular Function /drug effects

AccessionNumber
12013035312

Date bibliographic record published
16/07/2013
