Hyperthermia in breast-, bladder-, cervix carcinoma and soft tissue sarcoma patients
Kirisits A, Wild C

Record Status
This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Authors' objectives
To synthesize the evidence on efficacy of hyperthermia in combination with radiotherapy or chemotherapy in breast, bladder, cervix carcinoma and soft tissue sarcoma patients.

Authors' conclusions
Due to heterogeneity of the trials in technique, protocol, reporting of outcomes, control interventions, but also tumour characteristics within the same indication there is a high degree of uncertainty and the available evidence must be considered as insufficient. Large confirmatory RCTs are required.

Final publication URL

Indexing Status
Subject indexing assigned by CRD

MeSH
Hyperthermia, Induced; Breast Neoplasms; Urinary Bladder Neoplasms; Uterine Cervical Neoplasms; Soft Tissue Neoplasms; Sarcoma

Language Published
English

Country of organisation
Austria
