Tranexamic acid is associated with less blood transfusion in off-pump coronary artery bypass graft surgery: a systematic review and meta-analysis

Adler Ma SC, Brindle W, Burton G, Gallacher S, Hong FC, Manelius I, Smith A, Ho W, Alston RP, Bhattacharya K

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
21115366

DOI
10.1053/j.jvca.2010.08.012

Original Paper URL
http://dx.doi.org/10.1053/j.jvca.2010.08.012

Indexing Status
Subject indexing assigned by NLM

MeSH
Antifibrinolytic Agents /adverse effects /therapeutic use; Blood Loss, Surgical /statistics & numerical data; Blood Transfusion /statistics & numerical data; Coronary Artery Bypass, Off-Pump; Erythrocyte Transfusion /statistics & numerical data; Humans; Models, Statistical; Operative Blood Salvage; Postoperative Care; Postoperative Hemorrhage /blood /etiology; Prothrombin Time; Randomized Controlled Trials as Topic; Research Design; Risk Assessment; Thromboembolism /epidemiology; Tranexamic Acid /adverse effects /therapeutic use

AccessionNumber
12011001401

Date bibliographic record published
03/08/2011
