Favorable effects of vasodilators on left ventricular remodeling in asymptomatic patients with chronic moderate-severe aortic regurgitation and normal ejection fraction: a meta-analysis of clinical trials
Shah RM, Singh M, Bhuriya R, Molnar J, Arora RR, Khosla S

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
22707241

DOI
10.1002/clc.22019

Original Paper URL

Indexing Status
Subject indexing assigned by NLM

MeSH
Angiotensin-Converting Enzyme Inhibitors /therapeutic use; Antihypertensive Agents /therapeutic use; Aortic Valve Insufficiency /drug therapy /pathology; Calcium Channel Blockers /therapeutic use; Confidence Intervals; Disease Progression; Heart Ventricles /drug effects; Humans; Hydralazine /therapeutic use; Statistics as Topic; Stroke Volume; Vasodilator Agents /therapeutic use; Ventricular Function, Left; Ventricular Remodeling /drug effects

AccessionNumber
12012049808

Date bibliographic record published
21/12/2012
