Lack of association between EGF +61A>G polymorphism and melanoma susceptibility in Caucasians: a HuGE review and meta-analysis

Wu D, Wu Y, Zhang X, Cong P, Lv X

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
23201894

DOI
10.1016/j.gene.2012.11.014

Original Paper URL

Indexing Status
Subject indexing assigned by NLM

MeSH
Case-Control Studies; Epidermal Growth Factor /genetics; European Continental Ancestry Group; Genetic Association Studies; Genetic Predisposition to Disease; Humans; Melanoma /genetics /pathology; Polymorphism, Single Nucleotide; Promoter Regions, Genetic; Risk; Tumor Burden /genetics

AccessionNumber
12013010291

Date bibliographic record published
21/02/2013
