Positron emission tomography/computerised tomography imaging in detecting and managing recurrent cervical cancer: systematic review of evidence, elicitation of subjective probabilities and economic modelling

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

DOI
10.3310/hta17120

Indexing Status
Subject indexing assigned by NLM

MeSH
Asymptomatic Diseases; Chemoradiotherapy /statistics & numerical data; Cost-Benefit Analysis; Female; Great Britain; Humans; Hysterectomy /statistics & numerical data; Magnetic Resonance Imaging /economics /statistics & numerical data; Models, Economic; Multimodal Imaging /economics /statistics & numerical data; Pelvic Exenteration /statistics & numerical data; Positron-Emission Tomography; Quality-Adjusted Life Years; Recurrence; Sensitivity and Specificity; State Medicine /economics; Survival Analysis; Tomography, X-Ray Computed /economics /statistics & numerical data; Uterine Cervical Neoplasms /economics /radionuclide imaging /therapy

AccessionNumber
12013018996
