Late gadolinium enhancement on cardiac magnetic resonance predicts adverse cardiovascular outcomes in nonischemic cardiomyopathy: a systematic review and meta-analysis

Kuruvilla S, Adenaw N, Katwal AB, Lipinski MJ, Kramer CM, Salerno M

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
24363358

DOI
10.1161/CIRCIMAGING.113.001144

Indexing Status
Subject indexing assigned by NLM

MeSH
Cardiomyopathies /complications /diagnosis /physiopathology; Contrast Media; Death, Sudden, Cardiac /epidemiology /prevention & control; Delayed Diagnosis; Gadolinium DTPA; Global Health; Heart Failure /diagnosis /epidemiology; Humans; Incidence; Magnetic Resonance Imaging, Cine /methods; Myocardium /pathology; Predictive Value of Tests; Prognosis; Risk Factors; Survival Rate /trends; Time Factors; Ventricular Function, Left

AccessionNumber
12014000786

Date bibliographic record published
16/01/2014
