The clinical effectiveness of suction versus water seal for optimal management of pleural chest tubes in adult patients: a systematic review

Hawley D, Gunn S, Elliott R

Record Status
This is a systematic review that meets the criteria for inclusion on DARE. If you would like us to consider prioritising the writing of a critical abstract for this review please e-mail CRD-DARE@york.ac.uk quoting the Accession Number of this record. Please note that priority is given to fast track requests from the UK National Health Service.
