Meta-analysis of randomized trials comparing combined compression and anticoagulation with either modality alone for prevention of venous thromboembolism after surgery

Zareba P, Wu C, Agzarian J, Rodriguez D, Kearon C

Record Status
This is a systematic review that meets the criteria for inclusion on DARE. If you would like us to consider prioritising the writing of a critical abstract for this review please e-mail CRD-DARE@york.ac.uk quoting the Accession Number of this record. Please note that priority is given to fast track requests from the UK National Health Service.

Bibliographic details

DOI
10.1002/bjs.9527

Original Paper URL

Indexing Status
Subject indexing assigned by NLM

MeSH
Anticoagulants /therapeutic use; Combined Modality Therapy; Compression Bandages; Humans; Postoperative Complications /prevention & control; Postoperative Hemorrhage /chemically induced; Randomized Controlled Trials as Topic; Risk Factors; Venous Thromboembolism /prevention & control; Venous Thrombosis /prevention & control

AccessionNumber
12014038494

Date bibliographic record published
06/10/2014
