Effect of vitamin E supplementation on aminotransferase levels in patients with NAFLD, NASH, and CHC: results from a meta-analysis

Ji HF, Sun Y, Shen L

Record Status
This is a systematic review that meets the criteria for inclusion on DARE. If you would like us to consider prioritising the writing of a critical abstract for this review please e-mail CRD-DARE@york.ac.uk quoting the Accession Number of this record. Please note that priority is given to fast track requests from the UK National Health Service.

Bibliographic details

PubMedID
24976430

DOI
10.1016/j.nut.2014.01.016

Indexing Status
Subject indexing assigned by NLM

MeSH
Alanine Transaminase /metabolism; Antioxidants /pharmacology /therapeutic use; Aspartate Aminotransferases /metabolism; Dietary Supplements; Hepatitis C, Chronic /drug therapy /metabolism; Humans; Liver /drug effects /metabolism; Non-alcoholic Fatty Liver Disease /drug therapy /metabolism; Oxidative Stress; Vitamin E /pharmacology /therapeutic use

AccessionNumber
12014041875

Date bibliographic record published
20/10/2014
