Transjugular intrahepatic portosystemic shunting versus paracentesis plus albumin for refractory ascites in cirrhosis

Record Status
This is an economic evaluation that meets the criteria for inclusion on NHS EED.

Bibliographic details
Transjugular intrahepatic portosystemic shunting versus paracentesis plus albumin for refractory ascites in cirrhosis. Gastroenterology 2002; 123(6): 1839-1847

PubMedID
12454841

DOI
10.1053/gast.2002.37073

Indexing Status
Subject indexing assigned by NLM

MeSH
Ascites /etiology; Bacterial Infections; Female; Gastrointestinal Hemorrhage /etiology; Hepatic Encephalopathy /physiopathology; Hormones /blood; Humans; Injections, Intravenous; Kidney /physiopathology; Liver /physiopathology; Liver Cirrhosis /blood /complications /physiopathology /therapy; Male; Middle Aged; Paracentesis; Peritonitis /complications /microbiology; Portasystemic Shunt, Transjugular Intrahepatic; Retreatment; Serum Albumin /administration & dosage /therapeutic use; Severity of Illness Index; Survival Analysis

AccessionNumber
22003000023

Date bibliographic record published
20/01/2003
