Carbapenem versus fosfomycin tromethanol in the treatment of extended-spectrum beta-lactamase-producing Escherichia coli-related complicated lower urinary tract infection

Senol S, Tasbakan M, Pullukcu H, Sipahi OR, Sipahi H, Yamazhan T, Arda B, Ulusoy S

Record Status
This is an economic evaluation that meets the criteria for inclusion on NHS EED.

Bibliographic details

PubMedID
21123160

DOI
10.1179/joc.2010.22.5.355

Indexing Status
Subject indexing assigned by NLM

MeSH
Adult; Aged; Aged, 80 and over; Anti-Bacterial Agents /therapeutic use; Carbapenems /economics /therapeutic use; Drug Resistance, Bacterial; Escherichia coli /drug effects /enzymology; Escherichia coli Infections /drug therapy /microbiology; Female; Fosfomycin /economics /therapeutic use; Humans; Male; Microbial Sensitivity Tests; Middle Aged; Prospective Studies; Urinary Tract Infections /drug therapy /microbiology; Young Adult; beta-Lactamases /metabolism

AccessionNumber
22011000293

Date bibliographic record published
23/03/2011
