Health technology assessment of physician-manned ambulance service in Aarhus (co-funded by DIHTA)

Danish Centre for Evaluation and Health Technology Assessment

Record Status
This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation
Danish Centre for Evaluation and Health Technology Assessment. Health technology assessment of physician-manned ambulance service in Aarhus (co-funded by DIHTA) Copenhagen: Danish Centre for Evaluation and Health Technology Assessment (DACEHTA). 1998

Authors' objectives
This report aims to provide an assessment of whether prehospital treatment is improved through a shorter response time and an increased use of physicians in the ambulance service. Analysis of organisational matters, assessment of clinical and epidemiological effects, and consequences for the budget and the economy with a view to possibly turning the pilot scheme into a permanent scheme are considered.
