Recombinant human growth hormone (GH) therapy in adults with age-related GH deficiency
BlueCross BlueShield Association

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

The BlueCross BlueShield Association Technology Evaluation Center website (www.bcbs.com/tec) includes the most recent 3 years of TEC Assessments. To request older reports, please use the “contact us” feature on the website.

Citation

Authors' objectives
This Assessment examines the available evidence to determine the effects of recombinant human growth hormone (rhGH) therapy on the health outcomes of aging adults who do not have organic or congenital causes of growth hormone deficiency.
