Panitumumab (Vectibix®) as 1st-line combination therapy for the treatment of WT KRAS colorectal cancer – 1st Update 2011
Ludwig Boltzmann Institute for Health Technology Assessment

Record Status
This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Authors' conclusions
These findings highlight the fact that despite the availability of several different treatment options for mCRC further research is required to find the optimal sequence of the available agents, the ideal combination with chemotherapy and the optimal duration of treatment.
