Electrical spinal cord stimulation for the treatment of intractable angina pectoris

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Authors' objectives
Spinal cord stimulation (SCS) electrically stimulates the dorsal columns of the spinal cord using electrodes implanted into the epidural space. The purpose of SCS is to suppress pain in specific areas of the body for patients with chronic pain, including refractory angina.
