Implantable cardioverter defibrillators in arrhythmogenic right ventricular
dysplasia/cardiomyopathy: patient outcomes, incidence of appropriate and inappropriate
interventions, and complications

Schinkel AF

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details
Schinkel AF. Implantable cardioverter defibrillators in arrhythmogenic right ventricular dysplasia/cardiomyopathy:
patient outcomes, incidence of appropriate and inappropriate interventions, and complications. Circulation: Arrhythmia
and Electrophysiology 2013; 6(3): 562-568

PubMedID
23673907

DOI
10.1161/CIRCEP.113.000392

Indexing Status
Subject indexing assigned by NLM

MeSH
Adult; Aged; Anti-Arrhythmia Agents /therapeutic use; Arrhythmogenic Right Ventricular Dysplasia /diagnosis
/mortality /therapy; Death, Sudden, Cardiac; Defibrillators, Implantable; Female; Humans; Male; Middle Aged;
Prognosis; Risk Assessment; Survival Rate; Tachycardia, Ventricular /diagnosis /drug therapy /mortality; Treatment
Outcome; Ventricular Fibrillation /diagnosis /drug therapy /mortality

AccessionNumber
12013052104

Date bibliographic record published
18/09/2013
