Effectiveness and safety of novel oral anticoagulants compared with vitamin K-antagonists in the treatment of acute symptomatic venous thromboembolism- a systematic review and meta-analysis

van der Hulle T, Kooiman J, den Exter PL, Dekkers OM, Klok FA, Huisman MV

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
24330006

DOI
10.1111/jth.12485

Indexing Status
Subject indexing assigned by NLM

MeSH
Administration, Oral; Anticoagulants /administration & dosage; Benzimidazoles /administration & dosage; Dabigatran; Female; Hemorrhage; Humans; Male; Morpholines /administration & dosage; Pyrazoles /administration & dosage; Pyridines /administration & dosage; Pyridones /administration & dosage; Randomized Controlled Trials as Topic; Risk Factors; Rivaroxaban; Thiazoles /administration & dosage; Thiophenes /administration & dosage; Treatment Outcome; Venous Thromboembolism /drug therapy; Vitamin K /antagonists & inhibitors; beta-Alanine /administration & dosage /analogs & derivatives

AccessionNumber
12014000589

Date bibliographic record published
13/01/2014
