Special report: high-sensitivity C-reactive protein measurement for coronary heart disease risk stratification

BlueCross BlueShield Association

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

The BlueCross BlueShield Association Technology Evaluation Center website (www.bcbs.com/tec) includes the most recent 3 years of TEC Assessments. To request older reports, please use the “contact us” feature on the website.

Citation

Authors' objectives
The purpose of this Technology Evaluation Center (TEC) Special Report is to review evidence and logic that bear on the potential utility of C-reactive protein measurement to assess cardiovascular risk for the purpose of primary prevention of coronary heart disease (CHD).
