
D-Cycloserine for anxiety disorders

Record Status

This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

D-Cycloserine for anxiety disorders. Lansdale: HAYES, Inc.. 2009

Authors' objectives

D-cycloserine, an established treatment modality for tuberculosis, is an N-methyl-D-aspartic acid (NMDA) receptor agonist currently being investigated for the treatment of anxiety disorders. The goal of treatment with D-cycloserine is to reduce the frequency and intensity of symptoms associated with anxiety disorders, and to improve patient functioning and quality of life.
