Potential role of recombinant activated factor VII for the treatment of severe bleeding associated with disseminated intravascular coagulation: a systematic review

Franchini M, Manzato F, Salvagno G L, Lippi G

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
17890943

DOI
10.1097/MBC.0b013e32822d2a3c

Indexing Status
Subject indexing assigned by NLM

MeSH
Adult; Causality; Child; Comorbidity; Disseminated Intravascular Coagulation /drug therapy /mortality; Factor VII /pharmacology /therapeutic use; Factor VII Deficiency /drug therapy /mortality; Factor VIIa; Female; HELLP Syndrome /drug therapy /mortality; Hemostatics /pharmacology /therapeutic use; Humans; Male; Multiple Organ Failure /drug therapy /mortality; Postoperative Hemorrhage /drug therapy /mortality; Postpartum Hemorrhage /drug therapy /mortality; Pregnancy; Recombinant Proteins /pharmacology /therapeutic use; Survival Rate

AccessionNumber
12007003226

Date bibliographic record published
09/08/2008
