The use of recombinant luteinizing hormone in patients undergoing assisted reproductive techniques with advanced reproductive age: a systematic review and meta-analysis

Hill MJ, Levens ED, Levy G, Ryan ME, Csokmay JM, DeCherney AH, Whitcomb BW

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
22365075

DOI
10.1016/j.fertnstert.2012.01.130

Original Paper URL
http://www.fertstert.org/article/S0015-0282(12)00217-8/abstract

Indexing Status
Subject indexing assigned by NLM

MeSH
Adult; Age Factors; Aging; Drug Therapy, Combination; Embryo Implantation; Evidence-Based Medicine; Female; Fertility Agents, Female /therapeutic use; Follicle Stimulating Hormone /therapeutic use; Humans; Infertility, Female /etiology /physiopathology /therapy; Luteinizing Hormone /therapeutic use; Odds Ratio; Oocyte Retrieval; Ovulation /drug effects; Ovulation Induction /adverse effects /methods; Pregnancy; Pregnancy Rate; Recombinant Proteins /therapeutic use; Reproductive Techniques, Assisted /adverse effects; Treatment Outcome

AccessionNumber
12012023457

Date bibliographic record published
22/01/2013
