Detection rate of recurrent medullary thyroid carcinoma using fluorine-18 dihydroxyphenylalanine positron emission tomography: a meta-analysis

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
22819076

DOI
10.1016/j.acra.2012.05.008

Original Paper URL
http://www.academicradiology.org/article/S1076-6332(12)00305-4/abstract

Indexing Status
Subject indexing assigned by NLM

MeSH
Carcinoma, Neuroendocrine; Dihydroxyphenylalanine /analogs & derivatives; Humans; Neoplasm Recurrence, Local /epidemiology /radionuclide imaging; Positron-Emission Tomography /statistics & numerical data; Prevalence; Radiopharmaceuticals; Reproducibility of Results; Risk Factors; Sensitivity and Specificity; Thyroid Neoplasms /epidemiology /radionuclide imaging

AccessionNumber
12012043871

Date bibliographic record published
31/01/2013
