Risk of gastrointestinal perforation in cancer patients treated with vascular endothelial growth factor receptor tyrosine kinase inhibitors: a systematic review and meta-analysis

Qi WX, Sun YJ, Tang LN, Shen Z, Yao Y

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details
Qi WX, Sun YJ, Tang LN, Shen Z, Yao Y. Risk of gastrointestinal perforation in cancer patients treated with vascular endothelial growth factor receptor tyrosine kinase inhibitors: a systematic review and meta-analysis. Critical Reviews in Oncology/Hematology 2014; 89(3): 394-403

PubMedID
24182420

DOI

Indexing Status
Subject indexing assigned by NLM

MeSH
Humans; Intestinal Perforation /complications; Neoplasms /complications /drug therapy; Protein Kinase Inhibitors /adverse effects /therapeutic use; Receptors, Vascular Endothelial Growth Factor /antagonists & inhibitors

AccessionNumber
12013064794

Date bibliographic record published
26/11/2013
