Mineralocorticoid receptor blockade in addition to angiotensin converting enzyme inhibitor or angiotensin II receptor blocker treatment: an emerging paradigm in diabetic nephropathy. A systematic review
Mavrakanas TA, Gariani K, Martin PY

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details

PubMedID
24315413

DOI
10.1016/j.ejim.2013.11.007

Indexing Status
Subject indexing assigned by NLM

MeSH
Albuminuria /etiology; Angiotensin Receptor Antagonists /therapeutic use; Angiotensin-Converting Enzyme Inhibitors /therapeutic use; Diabetic Nephropathies /complications /drug therapy; Drug Therapy, Combination /methods; Glomerular Filtration Rate; Humans; Hyperkalemia /chemically induced; Mineralocorticoid Receptor Antagonists /therapeutic use; Renal Insufficiency, Chronic /complications /drug therapy; Spironolactone /analsogs & derivatives /therapeutic use; Treatment Outcome

AccessionNumber
12013071796

Date bibliographic record published
06/01/2014
