Systematic review and meta-analysis: sensitivity and specificity of Tc-99m hmpao labelled white cell scintigraphy in the diagnosis of active inflammatory bowel disease

Williams C, Ford A, Poullis A

Record Status
This is a systematic review that meets the criteria for inclusion on DARE.

Bibliographic details
Williams C, Ford A, Poullis A. Systematic review and meta-analysis: sensitivity and specificity of Tc-99m hmpao labelled white cell scintigraphy in the diagnosis of active inflammatory bowel disease. Gut 2014; 63(S1): A71

DOI
10.1136/gutjn1-2014-307263.149

Original Paper URL
http://gut.bmj.com/content/63/Suppl_1/A71.2.abstract

Indexing Status
Subject indexing assigned by CRD

MeSH
Humans; Inflammatory Bowel Diseases; Sensitivity and Specificity; Radionuclide Imaging

AccessionNumber
12014045517

Date bibliographic record published
24/10/2014
