The cost-effectiveness of oral direct factor Xa inhibitors compared with low-molecular-weight heparin for the prevention of venous thromboembolism prophylaxis in total hip or knee replacement surgery

Mahmoudi M, Sobieraj DM

Record Status
This is an economic evaluation that meets the criteria for inclusion on NHS EED.

Bibliographic details
Mahmoudi M, Sobieraj DM. The cost-effectiveness of oral direct factor Xa inhibitors compared with low-molecular-weight heparin for the prevention of venous thromboembolism prophylaxis in total hip or knee replacement surgery. Pharmacotherapy 2013

PubMedID
23625693

DOI
10.1002/phar.1269

Indexing Status
Subject indexing assigned by NLM

MeSH
Anticoagulants /economics /therapeutic use; Arthroplasty, Replacement, Hip /economics /methods; Arthroplasty, Replacement, Knee /economics /methods; Cost-Benefit Analysis; Decision Trees; Factor Xa Inhibitors; Heparin, Low-Molecular-Weight /economics /therapeutic use; Humans; Medicare; Models, Theoretical; Postoperative Complications /economics /prevention & control; Quality-Adjusted Life Years; United States; Venous Thromboembolism /economics /prevention & control

AccessionNumber
22013018367

Date bibliographic record published
13/06/2013
