Clinical practice guidelines for the advanced breast biopsy instrument

Walsh D, Merlin T, Humenuik V, et al

Record Status
This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Authors' objectives
The aim of these clinical practice guidelines is to summarise the current reported experience with the advanced breast biopsy instrumentation (ABBI) system. These guidelines are aimed specifically at health care professionals preparing to perform ABBI biopsies, rather than consumers. They are designed to help standardise the use of the procedure across Australasia, to facilitate assessment of this technique. It is hoped the guidelines may shorten the learning curve for new ABBI centres.
