Disposable or reusable gowns and drapes and surgical site infections
Bernath V

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

Citation
Bernath V. Disposable or reusable gowns and drapes and surgical site infections. Clayton, Victoria: Centre for Clinical Effectiveness (CCE) 2001: 10

Authors' objectives
This aim of this critical appraisal was to assess whether the use of disposable gowns and drapes is associated with a reduction in surgical site infection rates when compared with the use of reusable gowns and drapes.
