Should the McGill University Health Centre use safety devices to reduce needlestick injuries associated with intravascular infusions?

McGregor M, Costa V

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Authors' objectives
This report asks whether the McGill University Health Centre should use safety devices to reduce needlestick injuries associated with intravascular infusions? It is an update of TAU report Number 1, Feb 28,2002: “Should the McGill University Health Center replace the Jelco/Cathlon catheter by the ProtectIVPlus catheter for intravenous inclusions”.
