
Diagnostic management strategies for adults and children with minor head injury: a systematic review and an economic evaluation

Pandor A, Goodacre S, Harnan S, Holmes M, Pickering A, Fitzgerald P, Rees A, Stevenson M

Record Status

This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Pandor A, Goodacre S, Harnan S, Holmes M, Pickering A, Fitzgerald P, Rees A, Stevenson M. Diagnostic management strategies for adults and children with minor head injury: a systematic review and an economic evaluation. Health Technology Assessment 2011; 15(27): 1-283

Authors' conclusions

Review found that the Canadian Computed Tomography Head Rule was the most widely validated strategy for managing minor head injury in adults, but decision rules for children needed further validation.
