Biological mesh for abdominal hernia repair

Record Status
This is a bibliographic record of a published health technology assessment. No evaluation of the quality of this assessment has been made for the HTA database.

Citation
Biological mesh for abdominal hernia repair. Lansdale: HAYES, Inc.. Directory Publication. 2013

Authors' conclusions
The purpose of biological mesh is to provide supplemental reinforcement to primary surgical repair of hernias. Biological mesh has been speculated to reduce the likelihood of infections and adhesions and its use has been promoted for use in patients who have large or complex hernias or contaminated surgical fields.
