
Oral progesterone for the treatment of menopausal symptoms: clinical evidence

CADTH

Record Status

This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

CADTH. Oral progesterone for the treatment of menopausal symptoms: clinical evidence. Ottawa: Canadian Agency for Drugs and Technologies in Health (CADTH). Rapid Response. 2014

Authors' conclusions

One systematic review, 23 publications from randomized controlled trials, and two non-randomized studies were identified regarding the clinical efficacy of micronized progesterone or medroxyprogesterone, or the comparative clinical efficacy of micronized progesterone versus medroxyprogesterone, for the management of menopausal symptoms.
