
Effect of Increased Intensity of Physiotherapy on Patient Outcomes After Stroke: An Evidence-Based Analysis

Sehatzadeh S

Record Status

This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Citation

Sehatzadeh S. Effect of Increased Intensity of Physiotherapy on Patient Outcomes After Stroke: An Evidence-Based Analysis. Toronto: Health Quality Ontario (HQO). Ontario Health Technology Assessment Series; 15(6). 2015

Authors' conclusions

Overall, this analysis found support for the use of more intensive PT to improve motor function and ability to perform ADL after stroke.
